~~S~~UCCESS STORY

4-24-08

When I first began coming to Dr. Mauldin on Tuesday, March 25th, I had excruciating pain in my neck and upper back on the right side. I was unable to lift my arm up or to the side. If someone lifted my arm for me, once it was let go, I would immediately lose control and it would drop to my side. On a scale of 1-10, my pain was a 10+. Our family was scheduled to leave the next day for a family vacation and we were on the verge of canceling due to the pain I was in.

Dr. Mauldin took me in that morning and adjusted my neck and did therapy on me. She told me to go home, put ice on my neck and come back that afternoon. That afternoon when I went back she used the decompression machine on me. What relief!!!! She also did another adjustment and more therapy. My pain had lessened from a 10+ to a more tolerable 6 or 7. In addition to the care I received, she gave me my x-ray to take on vacation with me in case I need to get care while I was gone. All I could say was THANK YOU!! I was happy that I would still be able to take our family vacation.

Upon returning from vacation, my appointments with Dr. Mauldin continued on a schedule of at least 3 visits per week. Two weeks ago, I began to notice I was able to move my arm slightly. With continued decompression, adjustments and therapy; I can now fully raise my arm straight up and I can raise it to the right and up as well.

In addition to my neck pain, I had been struggling with lower right back pain. I had been seeking chiropractic care since Thanksgiving for it. After 4 months of chiropractic care elsewhere I received no relief. After 1 month of decompression, therapy, and adjustments by Dr. Mauldin, I am having no lower back pain.

I fully believe with out many prayers and the care I received from Dr. Mauldin that I may still not have mobility in my arm or I may have been facing surgery.

Many thanks to Dr. Mauldin

Praises to the Lord!!!
